SPECIFICATIONS SUBJECT TO CUSTOMIZATION BASED ON PROJECT REQUIREMENTS.

PRODUCT OVERVIEW

When storage demand exceeds available silo, warehouse, or terminal capacity, Rapidpack Ground Silos create scalable bulk storage where it is needed most.

Rapidpack Ground Silos transform open space into protected bulk storage using modular sidewalls, engineered ground liners, and weather-resistant covers.

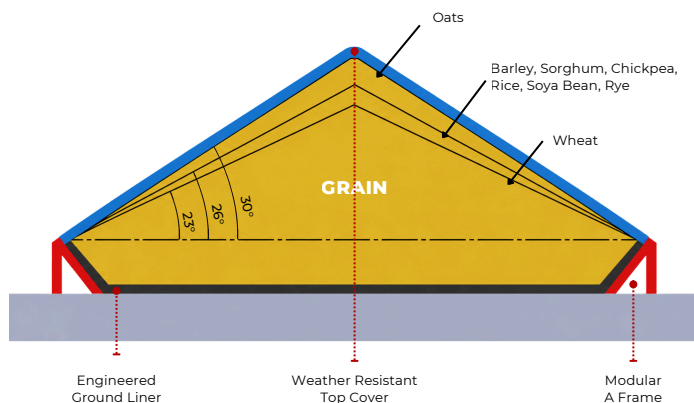

Ideal for harvest peaks, import campaigns, port operations, inland distribution hubs, and strategic commodity reserves.

Parameter	Specifications
Storage Capacity	5,000 - 60,000 MT
Deployment Time	Approx. 3-4 Days
Relocation Time	Approx. 2-4 Days
Storage Duration	Months to Years
Commodity Types	Grain, Fertilizer, Feeds, etc.
Configuration	Customizable

Common Applications	
Harvest Peaks	Additional capacity during seasonal demand
Port Operations	Buffer storage for vessel discharge & cargo arrivals
Distribution Hubs	Storage closer to processing and end markets
Strategic Reserves	Long-term commercial & government stockpiling

COMMODITY STORAGE REPOSE

Storage capacity varies based on commodity density and natural angle of repose

RAPIDPACK ADVANTAGES

Rapid Deployment

Create additional storage capacity in days.

Flexible Scalability

Configure capacity to operational requirements.

Cargo Protection

Weather-resistant covers & engineered ground liners.

Relocatable Design

Dismantle, move, & redeploy as needs change.

Integrated Aeration Port

Supports preservation & fumigation programs.

Modular Sidewall System

Expandable containment for large-scale storage.
