MOBILE RADIAL TELESCOPIC SHIPLOADER

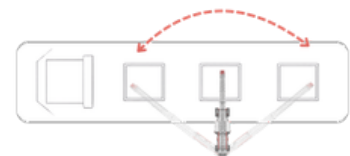

TELESCOPIC REACH

Extend or retract the boom to adjust the discharge point.

ADJUSTABLE HEIGHT

Raise or lower the boom to position where needed.

RADIAL MOVEMENT

Sweep across a wider working area from one position.

PRODUCT OVERVIEW

The Rapidpack Mobile Radial Telescopic Shiploader is designed to move dry bulk cargo continuously while allowing the discharge point to be repositioned across a wider operating area.

Its boom can extend and retract, raise and lower, and move radially around the working area - reducing the need to repeatedly reposition the complete machine.

Configured around your cargo, vessel, berth and operating requirements.

Specifications subject to customization based on project requirements.

Nominal Capacity	1,000 t/h
Conveyor Length	42 m
Telescopic Travel	13.5 m
Max. Discharge Height	15.2 m
Operating Angle	6°-18°
Belt Width	1,000 mm
Mobility	Wheeled + Powered Radial Movement

SHIPLOADING MODE

Reach Further. Load Wider!
